# MAGNOLIA METAL CORPORATION

combines our fully modernized foundry and state of the art machine shop facilities to produce babbitt bearings of the highest quality.

We specialize in journal, sleeve and thrust bearings lined with Magnolia grade 2 tin based babbitt metal manufactured in our own foundry. We are the only U.S. based babbitt bearing manufacturer to produce our own continuous cast bronze material and babbitt metal. These capabilities allow us to ensure unmatched quality in babbitt bearings.

Our years of experience and proprietary production process ensures proper babbitt thickness and bonding.

Our stocking program permits off the shelf service in many cases. We would be pleased to put our experience to work for you.

For babbitt bearings and completely finished parts manufactured in the heartland of America, call us today!

## Magnolia Delivers:

- Over 2,000,000 lbs. in stock.
- We stock the best: C-936, as well as Lead-Free B-1®. Other special alloys: C-903, C-927, C-932, C-937, C-941 and C-945.
- Parts made to your blueprints.
- Radii, keyways, oil grooves, windows and perfect halves.
- Parts from 3" to 34" O.D.
